Summary

Software Developer with 5+ years of experience in React.js, MERN, and Next.js, focused on building scalable, high-performance web applications. Skilled in frontend architecture, performance optimization, and robust backend integrations, with experience in Agile/Scrum environments.

Experience

Lumel Technologies LLP

Jul 2023 – Present

Product Developer

Chennai, TN

- Engineered a no-code data transformation interface, enabling operations such as append, merge, pivot, and group-by through an intuitive UI, reducing reliance on DAX/SQL scripting and cutting report development time by 30%.
- Built reusable, type-safe user interface components with TypeScript and TailwindCSS, supporting dynamic schema changes, composite modeling, and real-time writeback consolidation into unified planning tables.

Arus Info Private Limited

Oct 2022 – Jul 2023

Product Developer

Bangalore, KN

- Implemented a dynamic, self-service planning platform with time intelligence logic and rolling forecast capabilities, empowering business users to simulate revenue and accelerate decision-making cycles by over 40%.
- Designed complex planning and scenario simulation modules using React, implementing efficient state management and optimized rendering strategies to support bidirectional scenario modeling and multi-destination writeback.

Tata Consultancy Services Limited

Jun 2018 – May 2020

System Engineer

Bangalore, KN

- Engineered protection policy journeys across multiple syndication channels at Legal & General (UK's largest insurance provider) using JavaScript and Spring Boot, reducing the average number of user clicks by 80%.
- Improved policy submission success rate by 20% through enhanced user experience and performance optimizations.

Projects

Chatify | MongoDB, Express, React.js, Node.js, Socket.io, JWT

- Implemented real-time messaging and live online presence using Socket.io, enabling low-latency bidirectional communication and improving message delivery responsiveness by 40% compared to polling-based approaches.
- Built text and image chat workflows with optimistic updates in React, reducing perceived message latency.

Ideation | Next.js, TypeScript, TailwindCSS, Clerk, Motion, PostgreSQL

- Developed an AI-powered notes application integrating Google Gemini API for text autocomplete.
- Integrated AI-based image generation using contextual metadata with optimized rendering and responsive design.

Productify | PostgreSQL, Express, React.js, Node.js, TanStack Query, Drizzle

- Developed a full-stack application with consistent theming, secure REST APIs, and optimized database queries.
- Implemented server-state management, caching, and efficient data fetching to improve application performance.

Education

SASTRA Deemed to be University

May 2018

Bachelor of Technology in Mechanical Engineering (CGPA: 8.5)

Tanjore, Tamil Nadu

- Relevant Coursework:** Data Structures and Algorithms (DSA in JS), Introduction to Java, Programming in Python.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux Toolkit, Zustand, TailwindCSS, DaisyUI, Axios, HTML5, CSS3

Backend: Node.js, Express.js, REST API Development

Databases: MongoDB, PostgreSQL, MySQL

Tools: Vite, Webpack, Git, JWT, Vercel, Firebase, Postman, Figma

Technologies: TanStack Query, Socket.io, Clerk, Framer Motion, Mongoose, Drizzle ORM
